

# Meshari Naif

COMPUTER SCIENCE GRADUATE | AI & PRODUCT | FULL-STACK DEVELOPMENT | CYBERSECURITY

malanazi304@gmail.com +966 590 987 275 Riyadh, Saudi Arabia github.com/malanazi11 linkedin.com/in/meshari-naif-45693b279

## PROFESSIONAL SUMMARY

Ambitious Computer Science graduate from George Washington University with a versatile background spanning AI product development, full-stack software engineering, cybersecurity, digital banking technology, and strategic business development. Currently building and shipping AI-powered products at Unstuck Labs — an early-stage venture studio — while independently developing Jam3ah, a bilingual SaaS platform with a live user base. Brings a proven ability to design secure systems, lead digital products from concept to launch, collaborate across cross-functional teams, and deliver results in both startup and enterprise environments. Bilingual in Arabic and English with a strong commitment to contributing to Saudi Arabia's Vision 2030 technology agenda.

## PROFESSIONAL EXPERIENCE

### Unstuck Labs — AI Digital Agency & Venture Studio

April 2026 – Present

Junior Product Specialist | Washington, DC / Riyadh, Saudi Arabia

- Contributing to Summon, an AI-powered website builder; supporting product development lifecycle, go-to-market strategy, and growth of @summon.dev across TikTok and Instagram.
- Architected and launched Jam3ah, a bilingual (Arabic/English) full-stack SaaS platform; built Supabase/PostgreSQL backend, JWT authentication, role-based access control (RBAC), admin dashboard, and responsive UI serving live weekly users across seven content categories.
- Migrated application data layer from localStorage and SQLite to cloud-based Supabase, improving scalability, data integrity, and multi-user reliability.
- Leading Saudi Arabia business development outreach, engaging national institutions including Monsha'at, KAUST, STC, and Tuwaig to establish anchor partnerships.

### LoCAS — IoT Environmental Monitoring System | George Washington University

August 2025 – May 2026

Software & Systems Engineer | Senior Capstone Project, Washington, DC

- Developed a real-time IoT web platform for environmental monitoring; built the frontend dashboard, integrated sensor data APIs, and designed data ingestion pipelines for continuous telemetry.
- Collaborated in an Agile engineering team using GitHub; assisted in hardware integration and end-to-end system testing from sensor to interface.
- Awarded 3rd Place** at the Pelton Senior Design Competition, GWU School of Engineering & Applied Science, by Dean Jason M. Zara (May 2026).

### Albilad Bank — Saudi Arabia

November 2024 – January 2025

Security Application Developer Intern | Riyadh, Saudi Arabia

- Developed a production-grade secure mobile banking application in Java and Android Studio; implemented 2FA, AES-256 encryption, and secure session management.
- Integrated RESTful API backend and collaborated with security teams to meet PCI-DSS-aligned cybersecurity standards across Agile sprints.

## TECHNICAL SKILLS

|                   |                                                                                                                                           |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| AI & Product      | AI-Powered Product Development, LLM Applications, SaaS Platforms, Product Lifecycle Management, Go-to-Market Strategy, Prompt Engineering |
| Development       | Full-Stack Web Development, Java, Python, SQL, HTML5, CSS3, JavaScript, Android Development, RESTful APIs                                 |
| Cloud & Data      | Supabase, PostgreSQL, Firebase, JWT Authentication, RBAC, Real-Time Data Systems, IoT Data Pipelines                                      |
| Cybersecurity     | MFA/2FA, AES-256 Encryption, Secure API Design, PCI-DSS Awareness, OWASP Top 10, Threat Modeling, Row-Level Security                      |
| Tools & Practices | Git, GitHub, VS Code, Android Studio, Agile/Scrum, Software Testing, Digital Content Strategy                                             |
| Business          | Business Development, Strategic Partnerships, Stakeholder Management, Market Outreach, Operational Planning                               |

## EDUCATION

### Bachelor of Science in Computer Science

May 2026

George Washington University | Washington, DC | Internationally Accredited

- Relevant coursework: Data Structures & Algorithms, Software Engineering, Cybersecurity Fundamentals, Database Systems, Network Security

## AWARDS & RECOGNITION

- Pelton Senior Design Competition, 3rd Place** | GWU School of Engineering & Applied Science | Awarded by Dean Jason M. Zara, May 2026
- Recognition for Outstanding Contributions, Embassy of Saudi Arabia, DC | Honored by H.R.H. Princess Reema bint Bandar Al Saud | Certificate of Appreciation, Saudi Cultural Mission (SACM)

## LANGUAGES

- Arabic (Native) | English (Professional)
