Summary

Computer Science graduate from George Washington University with experience in secure software, IoT/AI systems, and product development. Currently Junior Product Specialist at an AI startup. Built a mobile banking security app using Java, Firebase, and REST APIs with 2FA and data encryption. Contributed to LoCAS, an IoT-based environmental monitoring system recognized at GWU's Pelton Senior Design Competition.

Experience

Unstuck Labs

Junior Product Specialist - Washington, DC 04/2026 - Present

- Support product development at an early-stage AI startup, contributing to feature definition, testing, and iteration.
- Collaborate cross-functionally to improve user experience and contribute to product strategy and documentation.

PROJECTS

LoCAS – Localized Collection & Analysis System | GWU - George Washington University Washington DC 08/2025 - 05/2026

- Developed a web-based platform for real-time greenhouse monitoring using sensor data
- Built frontend features to improve usability; integrated temperature, humidity, and environmental sensor data
- Collaborated in an Agile team using GitHub; assisted in hardware setup and system testing
- **Pelton Senior Design Competition – 3rd Place**, GWU School of Engineering & Applied Science, awarded by Dean Jason M. Zara (May 2026)

Saudi Cultural Mission

Program & Administrative Assistant - Washington, DC 02/2023 - 05/2025

- Supported educational and cultural programs serving Saudi students in the United States.
 - Assisted program managers with **event planning, coordination, and documentation**.
 - Managed office operations including **phone inquiries, document scanning, and records organization**.
 - Coordinated tasks across teams to support fundraising initiatives and community programs.

Saudi Embassy Washington DC

Passport DC (Volunteer) - Washington, DC 05/2022 - 05/2026

- Volunteered at embassy-organized **cultural and community events** supporting Saudi nationals and visitors.
- Assisted with **event coordination, guest guidance, and on-site support** during official programs.
- Communicated clearly with attendees while maintaining **professionalism and confidentiality**.

Albilad Bank (Saudi Arabia)

Security Application Developer (Intern) - Riyadh, Saudi Arabia 11/2024 - 01/2025

- Developed a secure mobile banking application using Java, Firebase, and Android Studio
- Implemented two-factor authentication (2FA) and encrypted user data to improve security
- Integrated backend services using REST APIs; collaborated with security teams to meet cybersecurity standards

Skills

Languages: Java, Python, SQL, HTML/CSS | Core CS: OOP, Data Structures, Algorithms | Security: Authentication, 2FA, Data Encryption
Backend: REST APIs, API Integration | Mobile: Android Development | Tools: Git, GitHub, VS Code | Database/Cloud: Firebase |
Practices: Agile Development, Software Testing

Education

Bachelor of Science in Computer Science

George Washington University, Washington, DC 05/2026

High School Diploma

King Abdullah Academy, Herndon, VA 06/2021

Languages

Arabic (Native), English (Professional)

Awards & Recognition

- **Pelton Senior Design Competition – 3rd Place**, GWU School of Engineering & Applied Science, May 2026 — Awarded by Dean Jason M. Zara for the LoCAS project.
- Recognition for Volunteer Contribution – Passport DC (2022–2026), Embassy of Saudi Arabia, Washington, DC — Honored by H.R.H. Princess Reema bint Bandar Al Saud.
- Certificate of Appreciation – Saudi Cultural Mission (SACM), Washington, DC — Recognized for organizing Saudi National Day and Founding Day events.
- Cultural Agreement Recognition – Saudi Cultural Office, Washington, DC — Awarded by Dr. Fawzi Bukhari for cultural programs and community engagement.
