

MESHARI NAIF

Software Engineer | Full Stack | Product

◆ malanazi304@gmail.com ◆ +966 590 987 275 ◆ 0554176557 ◆ linkedin.com/in/meshari-naif-45693b279 ◆ github.com/malanazi11

◆ Riyadh, Saudi Arabia

PROFESSIONAL SUMMARY

Computer Science graduate from George Washington University with hands-on experience building full-stack applications, leading product development cycles, and shipping software to real users. I have worked across early-stage startups and corporate environments, which gave me a solid foundation in both the technical and business sides of software. I enjoy building things that actually work and solving problems that matter.

EXPERIENCE

Innovation Support

October 2026 – Present

Software Engineer | Riyadh, Saudi Arabia

- ◆ Developing and maintaining internal software systems as part of the company's core development team.
- ◆ Contributing to the full software development lifecycle from requirements gathering through deployment and support.
- ◆ Collaborating with cross-functional teams to deliver reliable, scalable software solutions.

Unstuck Labs

April 2026 – September 2026

Junior Product Specialist | Washington, DC

- ◆ Drove product development and client outreach for Summon, an AI-powered website builder that helps small businesses launch their online presence in minutes.
- ◆ Created and managed social media content across multiple platforms, growing engagement and communicating product value to target audiences.
- ◆ Led business development efforts focused on the Saudi market, identifying opportunities and building relationships with potential clients and partners.
- ◆ Handled end-to-end client communication from initial outreach through onboarding, ensuring a smooth experience at every stage.

Albilad Bank

November 2024 – January 2025

Security Application Developer Intern | Riyadh, Saudi Arabia

- ◆ Developed and tested security-focused internal applications within a regulated banking environment.
- ◆ Worked alongside senior engineers to identify vulnerabilities and implement secure coding practices across existing systems.
- ◆ Gained firsthand experience with enterprise software standards in a major Saudi financial institution.

George Washington University

August 2025 – May 2026

Software and Systems Engineer, LoCAS Capstone | Washington, DC

- ◆ Built a Location-aware Campus Alert System combining IoT sensors, real-time data pipelines, and a full-stack web interface to improve campus safety response times.
- ◆ Won 3rd Place at the Pelton Senior Design Competition, awarded by GWU School of Engineering and Applied Science Dean Jason M. Zara, May 2026.

PROJECTS

Jam3ah

SaaS Platform | Full Stack

- ◆ Built a bilingual Arabic and English trivia game platform from scratch, covering backend architecture with Supabase and PostgreSQL, JWT-based authentication, role-based access control, and a responsive front-end designed for Arabic-speaking audiences.
- ◆ Launched commercially and currently managing active users across weekly game sessions.

Freelance Web Development

Client Work | UI/UX and Full Stack

- ◆ Designed and delivered custom websites for small businesses, handling everything from UI/UX design to deployment and post-launch maintenance.

EDUCATION

George Washington University

May 2026

Bachelor of Science in Computer Science

Washington, DC | GPA: 3.3 / 4.0 | SEAS Dean's Recognition

SKILLS

Languages:	Python, JavaScript, TypeScript, SQL, Java, C	Frameworks:	React, Next.js, Node.js, Express, FastAPI
Databases:	PostgreSQL, Supabase, MySQL, Firebase	Tools and Platforms:	Git, GitHub, Docker, Vercel, AWS, Linux
Security:	JWT, RBAC, secure coding, penetration testing basics	Languages Spoken:	Arabic (native) English (professional)
